Description of Services: Google Hangouts are a free web-based video chat. Google limits each hangout to a maximum of ten participants.	ì	
Purpose: The purpose of the program is to offer teens with FA an opportunity to tawith one another, and, maybe, make friends. Because FA is a rare disease, teens meave a peer to talk to nearby. Additionally, adolescence is a time when identifying one's peers is very important. The hope is that we will support your teen by offering way to connect in a structured and hopeful environment.	ay not with
